

Release 2016.2.8 Fixes

CareVue

Meds Tab displays Stop Date for inpatient medications

The CareVue Meds tab now displays Stop Dates for inpatient medications as expected.

Required action: On the Meds tab, find and view inpatient medications that have a Stop Date, e.g., Active, Discontinued, Expired.

Electronic Prescribing

eRx mapping for VA allergies corrected

Medsphere discovered an issue that prevented allergies entered using the VA Allergy dictionary in CareVue from mapping correctly in eRx. The issue is resolved and VA allergy mapping works as expected.

Required action: Test using eRx for a patient with allergies entered using the VA allergy dictionary (e.g., SULFA DRUGS). Confirm that they appear in the eRx screens on the left-hand side of the page as mapped allergies.
