

Note for CareVue Artifact 20651

External Image Viewer opens image or PDF and minimizes it in the taskbar

CareVue's External Image Viewer opens an image and makes it accessible and viewable until the user dismisses the dialog.

Required action: Select a patient with an attached image. From the CareVue Tools menu and the View Images option, select an image and view it using the External Image Viewer option.

Suggested additional testing: Confirm that the temp directory deletes temporary files created by CareVue after closing the viewer dialog.
