## Release 2017.2.2 Fixes

### CareVue

#### *Meds tab now includes enhanced sorting functions*

The Meds tab sort function now includes the following statuses by date:

DISCONTINUED	dc
HOLD	h
PENDING	p
ACTIVE	a
EXPIRED	e
UNRELEASED	u
TRANSFER TO OP	TOP
TRANSFER TO IP	TIP

**Required action:** Test in your normal Meds tab workflow.

**Related artifact:** 21339

#### *Inpatient medication order prints display start date*

Users can now print inpatient medication orders with a start date.

**Required action:** Test by printing inpatient medication orders in your normal pharmacy workflow.

**Related artifact:** 21417

#### *All Active and Pending orders display on the Meds tab*

Active and Pending orders now always display on the Meds tab regardless of the date of last activity.

**Required action:** Test by viewing the CareVue Meds tab of a patient with medication orders (home / inpatient or outpatient) entered more than three years ago.

**Related artifact:** 21516

## Reporting

### *Meaningful Use Stage 2 EH and EP Med rec objective reports upgraded*

According to new guidance from CMS, only new patients should be counted in the MIPS ACI report on Medication Reconciliation. In response, this release provides more flexibility in how patients are counted in the denominator, i.e., whether they require Med Rec for purposes of the measure. Because most CareVue users perform and record Med Rec for all patient encounters, this release includes the option to run the report for all patients or only new patients.

**Required action:** A new XPAR named **MSCR EP MED RECON ALL PTS** has **Y** or **N** setting options. Set to **Y** to include all outpatient visits in the denominator of the Med Rec report, as in previous versions. Set to **N** or don't set to add a patient to the denominator only under the following conditions:

- An outpatient visit has **MSC NEW PATIENT FLAG** set in the **VISIT** file.
- The **V CPT** file includes any of the following new patient CPT codes: 99201, 99202, 99203, 99204, 99205.

Record any of these CPT codes using the **Super Bills** component of the Superbill tab in CareVue.

For assistance in creating a Super Bill with these CPT codes, contact Julie McPherson ([julie.mcpherson@medsphere.com](mailto:julie.mcpherson@medsphere.com)) at Medsphere.
