

Sometimes it is necessary to find the Mirth Java version being used for a site. The Java version on the workstation must adhere to the Java version required on the Mirth server. When accessing the Mirth application you can find the version used below.

Please note: the workstation launching Mirth may have multiple versions of Java installed, however, the version below is what Mirth is actually using.

Click on the “About Mirth Connect” link on the left and the dialog here will come up showing the Java version (as well as other useful information)

The screenshot displays the Mirth Connect user interface. On the left, there is a navigation sidebar with sections: 'Extensions', 'Dashboard Tasks' (containing a 'Refresh' button), and 'Other' (containing links for 'Help on this topic', 'About Mirth Connect', 'Visit mirthcorp.com', 'Report Issue', and 'Logout'). The 'About Mirth Connect' link is highlighted. The main area shows a list of tasks, each with a green status indicator and a 'Started' label. The tasks include: 'PROD Pharmacy Charges toOV', 'PROD Pharmacy Orders_ADT fromOV', 'PROD REF Lab Orders fromOV', 'PROD REF Lab Results fromQuest', 'PROD REF Lab Results toOV', 'TEST ADT toOV', 'TEST All Charges to INSIGHT', 'TEST Allergy Message fromOV', 'TEST PE and Other Charges fromOV', 'TEST PE Charge Script', 'TEST Pharmacy Charges toOV', 'TEST Pharmacy Orders fromOV', 'TEST REF Lab Orders fromOV', 'TEST REF Lab Results fromQuest', and 'TEST REF Lab Results toOV'. At the bottom of the task list, there are tabs for 'Server Log' and 'Connection Log'. On the right side, an 'About' dialog box is open, titled 'About Mirth Connect'. The dialog contains the following information: 'Mirth Connect Server 2.2.1.5861', 'Built on February 28, 2012', 'Server ID: 41193af4-67d1-48f7-b3aa-5e519e81ee93', 'Java version: 1.7.0_67', and copyright information: '(c) 2005-2018 Mirth Corporation. All rights reserved. Visit http://www.mirthcorp.com'. It also mentions that the product includes software developed by SymphonySoft Limited (http://www.symphonysoft.com) and its contributors. A 'Close' button is located at the bottom right of the dialog.
