Information Management

Configuration

1. The Enhanced PEHR module is added as a tab above the Patient Record tab level after signing into CareVue update mode. Contact Medsphere Customer Care (http://support.medsphere.com/ and 1-877-633-7743) for Enhanced PEHR module implementation support.

2. Assign the MSCOREH security key to users who have access to the Enhanced PEHR module.

3. Enter the Note Assist URL in the MSCN NOTEASSIST URL parameter. This URL is different for each site. See the following example: *http://qalinuxgtm02.medsphere.com:18280/QA730-NoteAssistService/#*

Navigation and Documentation Selection

An enhanced personal electronic health record (PEHR) tab added to CareVue enables providers to generate a patient clinical documentation record in PDF format for inpatient visits. The PEHR tab is added at the top level of CareVue.

To generate a PEHR:

1. Select a patient by typing the **last name,first name** in the **Patient Selection** search box.

   *A list of the patient's visits display in the **Inpatient Visit Details** pane on the right side of the tab.*

2. Highlight the visit to include in the report.

3. Select the sections to include in the report from the **Report Selections** pane on the bottom of the tab.

4. Click the **Run** button at the bottom of the tab to produce the report.

Figure 1: Enhanced PEHR Tab

4. When the report is complete, click the **View Report** link.
