Restarting Application in Glassfish

After making configuration changes in CareVue for applications, the application in Glassfish will need to be restarted to reflect those changes.

1. Log in to the GlassFish web console.

> The address will be the following for Glassfish 3: https://IP address
> or hostname of gf server:4848/common/index.jsf
> Username: admin
> Password: mscadminadmin

> The address will be the following for Glassfish 4: https://IP address
> or hostname of gf server:18248/common/index.jsf
> Username: admin
> Password: mscadminadmin
> **Note: If you need assistance getting the exact address for your site, please contact Customer Success.**

2. Click on Applications under the Common Tasks window in the left pane.

3. Check the box next to the Application that needs to be restarted. Make sure you choose the name for the correct environment (DEV, TEST, TRAIN, or PROD).

4. Click the Disable button:

5. After the Disable finishes, check the box next to the Application that needs restarted. Make sure you choose the name for the correct environment (DEV, TEST, TRAIN, or PROD). It will now have a red X in the Enabled column.

6. Click the Enable Button:
