

Release 2019.1.3 - Advanced Medication Reconciliation

Admission and Transfer Med Rec Note refinements

The Admission and Transfer Med Rec note now incorporates the following changes:

- Patient, MRN and DOB labels are added to the top header.
- The Physician Reconciliation section header now displays as Provider Reconciliation.
- When a home med order is copied to inpatient meds, the home med Action Taken field now displays as ADDED TO INPATIENT MEDICATIONS.
- If an order is continued, the Action Taken field now displays as CONTINUE.
- If an order is changed, a new order is created. The original order Action Taken field now displays as STOPPED DUE TO CHANGE.
- If an order is renewed, a new order is created. The original order Action Taken field now displays as STOPPED DUE TO RENEW.
- If a home med order is marked as Already Ordered, the home med order Action Taken field now displays as Already Ordered.
- All new orders created as a result of adding, changing, renewing or copying a medication display with the text “New medication added” and the Action Taken field displays as ADD.

Required action: Test by performing all the above actions on medication orders within Admission and Transfer Advanced Medication Reconciliation dialogs. Evaluate the Admission and Transfer Med Rec notes for accuracy.
